Professional Summary

Seeking an opportunity in a dynamic organization where I can learn, grow, and contribute effectively. I aim to enhance my knowledge, develop new skills, and work towards achieving both personal and organizational success.

Skills

- Java: ★★★★★☆
- Selenium: ★★★★★☆
- SQL: ★★★★★☆
- Manual Testing: ★★★★★☆
- Cucumber BDD: ★★★★★☆
- Test NG: ★★★★★☆

Certifications

- MySkill-Z certificate in Selenium L1
- Java Selenium Automation Testing in Udemy
- Application Software Testing in Udemy

Practice Projects

- **Tasty Nibbles Web-Application Automation: BDD with Java, Selenium and Cucumber**
 - Built a test automation framework using Java, Selenium, Cucumber, Maven, and TestNG, organized with Page Factory to keep the code clean and easy to maintain.
 - Automated key user actions like sign-up, login, searching for products, adding items to the cart, checking out, and logging out.

- Added custom error handling with try-catch blocks to make debugging easier and more informative.
 - Used Cucumber and Allure to generate detailed and visually rich test reports.
 - Stored all project components—code, documentation, and reports—in a GitHub repository for easy access and version control.
- **Selenium Automation Project – Automation Exercise**
 - Automated functional test scenarios (registration, login, logout, duplicate user handling, contact form, product search, subscription, and product validation) for Automation Exercise using Java, Selenium WebDriver, and TestNG.
 - Designed and implemented a Page Object Model (POM) based test automation framework with reusable page classes, test classes, utilities, and configuration management.
 - Implemented positive and negative test cases with explicit waits (WebDriver Wait) to handle dynamic elements and ensure stable and reliable test execution.
 - Generated execution reports and captured failure details (screenshots/logs) to improve debugging and test result analysis.
 - Built the framework using Maven for dependency management and executed tests via TestNG XML, with full project versioning and documentation pushed to GitHub.

Education

- Bachelor of Technology – Electronics and Communication Engineering (ECE) - Rajeev Gandhi Memorial College of Engineering & Technology 2024
- NRI Junior College 2020
- Sri Visweswara English Medium High School 2018

Additional Information

- Languages: Fluent in English, Conversational in Telugu, Hindi.
- Availability: Full-Time
